

POTENTIAL U.S. EPA-REGISTERED DISINFECTANTS TO USE AGAINST THE AVIAN INFLUENZA VIRUS ON FARM SETTINGS IN THE UNITED STATES

This table is meant to assist persons in finding U.S. Environmental Protection Agency (EPA)-registered pesticides that may be used against the avian influenza virus in farm settings, as permitted by the EPA-registered product label. This table may not be an all-inclusive list of EPA-registered pesticides that could be used against the avian influenza virus. This table includes only those pesticides that the National Pesticide Information Retrieval System (NPIRS[®])¹ indicated were EPA-registered for use against avian influenza in or on farm premises and related structures and equipment. The information was obtained from the NPIRS[®] from January 9, 2014 to March 11, 2014.

While an applicator may utilize this list to assist in finding potential registered products, it is the applicator's responsibility to ensure that the product label indicates the applicable pests and use sites. Product labels are found on the product container. Product labels may also be found on EPA's Pesticide Product Label System (PPLS)². Applicators should note that the product labels appearing on PPLS are the "master labels." Many products are sold for use with a product label that contains a subset of the use sites and pests found on the master label, so applicators must defer to the product label appearing on the pesticide container.

The inclusion of any product on this table does not imply endorsement of the product by USDA APHIS VS.

¹ The National Pesticide Information Retrieval System (NPIRS[®]) is a collection of pesticide-related databases, applications, and web sites under the administration of the Center for Environmental and Regulatory Information Systems (CERIS) at Purdue University, West Lafayette, Indiana. The NPIRS[®] obtains product information on a monthly basis from the EPA Pesticide Product Information System (PPIS) website. This PPIS information, including registered use sites and pests listed on the EPA stamped approved label, is disseminated through the NPIRS[®] member and public websites and is provided for informational purposes only. Information derived from the NPIRS[®] does not constitute a label replacement or a recommendation. Before applying any pesticide, applicators must determine if the product under consideration is correct for the intended use site. Always check the container/package label to determine if the intended use site is included on the label. Read and follow label instructions before using any pesticide product. More information on the NPIRS[®] can be found at <http://ppis.ceris.purdue.edu/>. Errors in the PPIS data can be reported at this website using the Data Quality menu option.

² To access the most recently approved product labels, see EPA's Pesticide Product Label System (PPLS) site at: <http://iaspub.epa.gov/apex/pesticides/f?p=PPLS:1>. The pesticide product name, company name, or the EPA registration number can be used to access the product label in PPLS. If you enter the company name, a list of the company's products will appear. Select the product of interest. If you enter the product name or EPA registration number, a list of EPA-approved labels will appear in chronological order, with the most recent label appearing first. Click on the most recent date to obtain the most recent label.
